Jonathan Wang

Tempe, AZ | jonathan.o.in1@gmail.com | linkedin.com/in/jwang375 | github.com/jonathanwang375

Education

University of Tennessee - Knoxville, TN — Jan 2024 - Dec 2025
MS Computer Science (Data Mining and Intelligent Systems) — GPA: 3.94 / 4

- Additional Coursework: Human-Computer Interactions, Reinforcement Learning, Advanced Software Engineering, Natural Language Processing, Algorithms

Arizona State University - Tempe, AZ — Aug 2015 - May 2020
BS Economics
BA Mathematics

Experience

RemoraCarbon – Wixom, MI
Software Engineer - Controls — May 2022 – Jul 2023

- Increased the scalability of Python code that translates CAN data into readable engineering units
- Developed and integrated a dashboard device to allow drivers to monitor CO_2 tank levels and offload CO_2 when necessary
- Maintained and enhanced an internal website to allow every sub team to access and analyze high resolution data from all tests
- Responsible for software version releases and CI/CD pipelines through GitHub Actions to decrease down time and improve software stability
- Created and manage both the hardware and SQL dashboards for all 10 benchboxes so that all the subteams can run their own tests

dBControl – Fremont, CA
Software Engineer — Jun 2021 – Mar 2022

- Architected and deployed a multi-functional internal database through Epicor
- Published Python scripts to automate data cleaning and processing for the company database

Projects

Real vs Fake Face Detection

- Used Tensorflow to create a CNN model to distinguish between 2,000 real and fake faces of varying difficulties with over 80% accuracy

DnD AI

- Used OpenAI to create a RAG that would assist with DnD-related question and create character sheets
- Used Scrum and Agile techniques to keep us on track

Skills

Python Packages: Tensorflow, Keras, PyTorch, NLTK, Gensim, BART, Scikit-Learn, HuggingFace, NumPy, PySpark, MuJuCo, Pandas
Software: Jira, Agile, Scrum, GitHub, Docker
Business Intelligence Tools: Tableau, Grafana
Operating Systems: Ubuntu, Windows, RedHat
